

## Amplatz Ultra Stiff® Guidewire

### Intended Use:

Used to gain access to desired anatomical location and to assist in placement of medical devices during diagnostic or interventional procedures

Type  
J Tip

Size (in inch)  
0.035

Length (in cm)  
80

### Key Features and Benefits:

- PTFE coated stainless steel mandril with 5 cm atraumatic floppy tip for less trauma
- Smooth transition from stiff mandril to the flexible tip
- The stiffness of the mandril design provides support for the advancement of devices such as dilators, catheters and instruments
