

# Prime Wire®

## PTFE Nitinol Guidewire

**Intended Use:**

Used to gain access to desired anatomical location and to assist in placement of medical devices during diagnostic or interventional procedures

**Types**  
Straight Tip

**Size (in inch)**  
0.025, 0.032, 0.035 & 0.038

**Length (in cm)**  
150

**Key Features and Benefits:**

- **All-in-one design:** Streamlines urology procedures
- **Hydrophilic floppy tip (5cm):** Facilitates access in tortuous anatomy
- **Teflon coating:** Enables low-friction navigation and easy device advancement
- **Single wire access:** Avoids wire exchanges; enables access and stenting with one wire
- **East access:** Reduces procedural time
