

## Screw Dilator

**Intended Use:**

Used for dilation of narrow ureteral segments.

**Size (in Fr)**  
12, 14 & 16

**Length (in cm)**  
25

**Key Features and Benefits:**

- Optimal radiopacity for better visualization
- Screw tip for one step dilation of fascia during mini PCNL procedure
- Also available with compatible amplatz sheath
- Avoids sequential dilatation, reducing procedural time
